

"STARLET"

Beadwoven earrings

Tutorial

© 2014 by Iulia Postică from www.BeadedTreasury.com

TECHNIQUES

Beadweaving

PROJECT LEVEL

Beginner to Intermediate

MATERIALS

1 gr. white luster opaque 11/0 seed beads

0.5 gr. crystal rainbow 15/0 seed beads

Size B white beading thread

2 12 mm silver perforated round disks

2 13mm silver plated flat pad post earring findings with prongs (to match the 12mm disks)

2 earrings stoppers

TOOLS

Size 11 beading needle

Scissors

A flat nose pliers

FINISHED SIZE

Diameter - 1.8 cm (approx. 0.7 inches)

INSTRUCTIONS

Materials you'll need for the project.

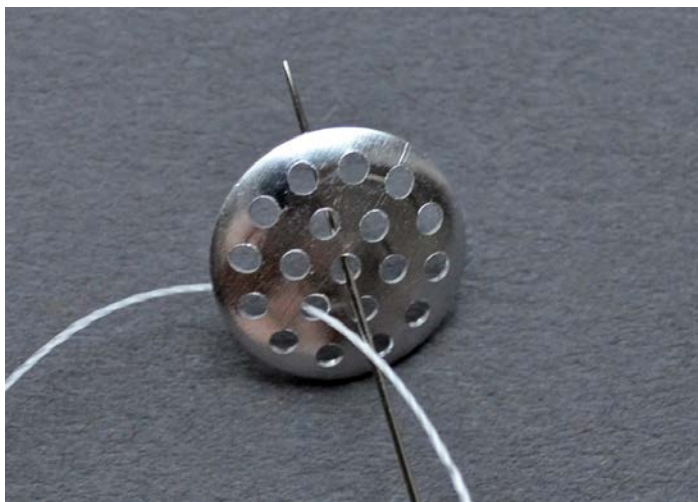

Step 1.

Cut about 90 cm (35.4 inches) of thread and pass it through the needle hole.

Take the perforated disk and hold it with the convex side facing upward. This will be the front side of our work.

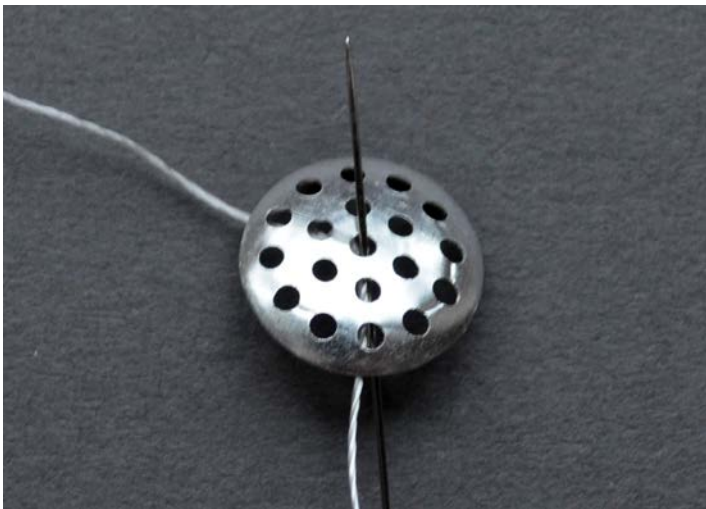

Bring the needle through one of the holes of the inner round of holes, back to front.

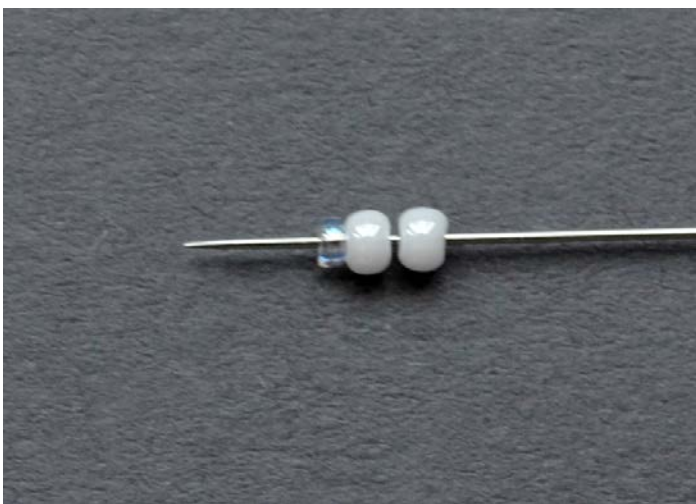

Take the needle to the back side through the central hole of the perforated disk.

Turn the disk on the other side and tie the threads together with two square knots, leaving a tail of 10 cm (4 inches).

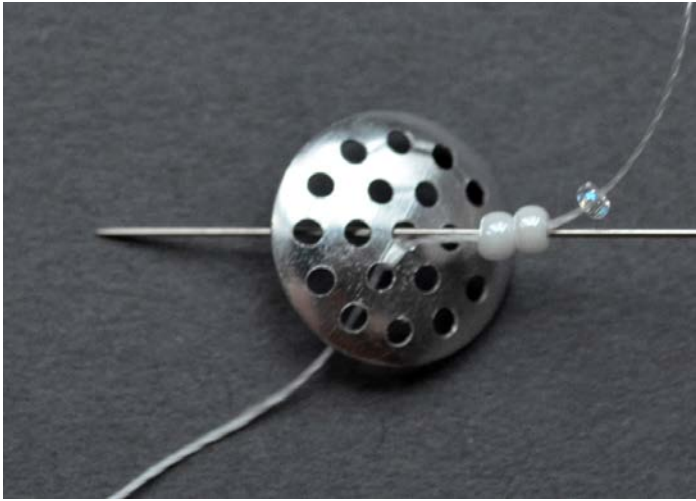

Take the needle back to the front side through the central hole of the perforated disk.

Step 2.

Pick two 11/0 seed beads and one 15/0 seed bead and slide them down toward the perforated disk.

Skip the 15/0 seed bead and go back through the two 11/0 seed beads and the hole of the perforated disk the thread exited from (in this case the central hole), going to the back side of the disk.

Step 3.

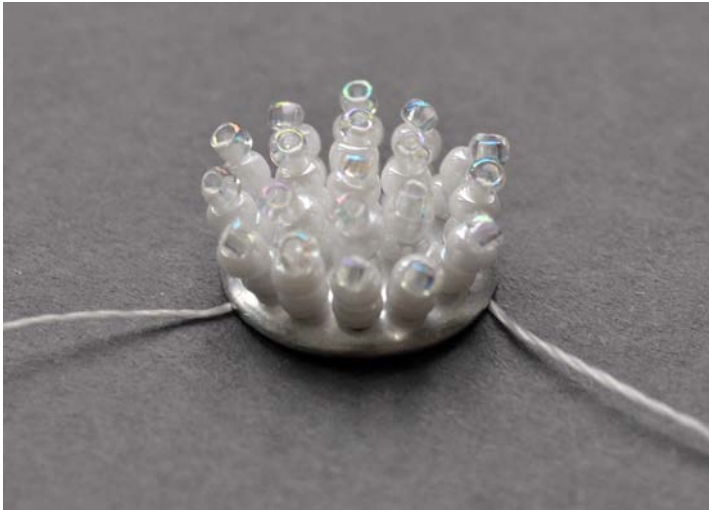

Take the needle back to the front side through one of the holes of the inner circle of holes of the perforated disk.

Repeat adding in each hole of the inner circle seed beads as explained at **Step 2**.

Step 4.

After having added seed beads in the inner circle of holes take the needle to the outer circle and continue adding seed beads as explained at **Step 2**.

This is how our perforated disk looks like with all holes covered with heed beads.

Step 5.

In this step we will be adding more seed beads in the outer circle of holes.

For this, take the needle to the front side through the next hole in the outer circle.

Add seed beads as explained at **Step 2** in each outer hole. This time the seed beads will lie horizontally around the perforated disk as shown in the picture on the left.

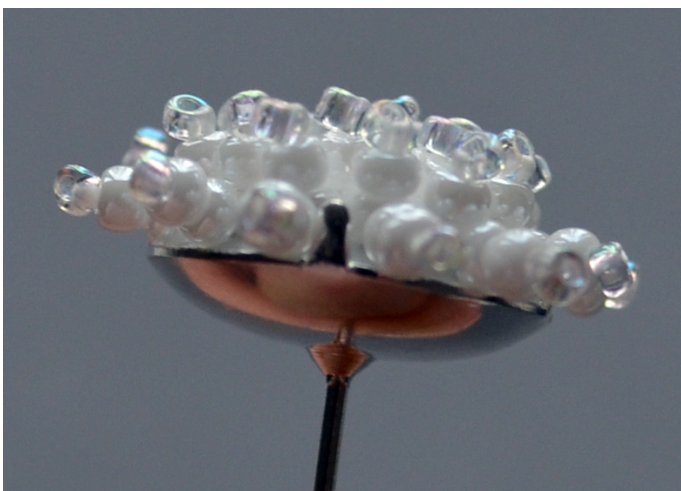

This is the completed starlet.

Step 6.

On the back side, tie the two thread ends together with a few square knots and cut the excess.

Step 7.

Insert the beaded disc on top of the ear pad with prongs.

Now we need to fix the perforated disk on the ear pad by bending the prongs inward.

Use a flat nose pliers to do this as shown in the picture on the left.

Be careful not to break the seed beads.

Congratulations! The earring is ready!

I hope you liked this tutorial and enjoyed your beading.

I always enjoy seeing your interpretation of my designs. Therefore feel free to send me pictures of projects you will make using this tutorial. With your permission I will share them on my facebook page: <https://www.facebook.com/BeadedTreasury>

This tutorial is for personal use. You can sell finished earrings, but please mention that you got the pattern from www.BeadedTreasury.com
